

Student Registration Application

FREE Subscription for 1st Year

Who?

SchoolStream is hosting a Student Registration Application webinar to help districts learn how they can mitigate health risks, save costs, and streamline the student registration process for their students, parents, and staff. **Registering and attending the webinar will automatically qualify you for a FREE subscription to the application for one year.**

When?

Webinars will be hosted at the following time slots. If you are unable to attend, please contact us at sales@rtresponse.com to coordinate a demo time:

- 7/6 @ 2:00pm ET
- 7/10 @ 2:00pm ET
- 7/15 @ 2:00pm ET

- a. **Register Here:** <https://calendly.com/schoolstream-am/schoolstream-student-registration-demo>

What is the Student Registration Application?

SchoolStream's Student Registration Application eliminates the paperwork and automates the workflow of new student registration forms for parents. Here are a few key features and value points:

- Digitize all student registration forms and send them to parents to complete online
- Create different student registration packages and send yearly forms (ex. Emergency contact, tech acceptable use forms, etc.) for all parents to complete
- Automate the workflow and "parallelly process" each form in the student registration package to have it route to the appropriate person or department for processing
- Create "common information" across all forms in the registration forms to pre-populate forms to make it quicker for parents to complete
- Create dynamic reports off any student information captured in the forms
- Export and integrate student registration data into your Student Information System to avoid double data entry
