

SCHOOLSTREAM

About Us

SchoolStream, a company of Right Response, LLC provides the best Return On Investment (ROI) Business Process Automation Platform (BPAP) and Applications to Automate Instructional & Non-instructional Operations in the K-12/Public education sector.

Background & Experience

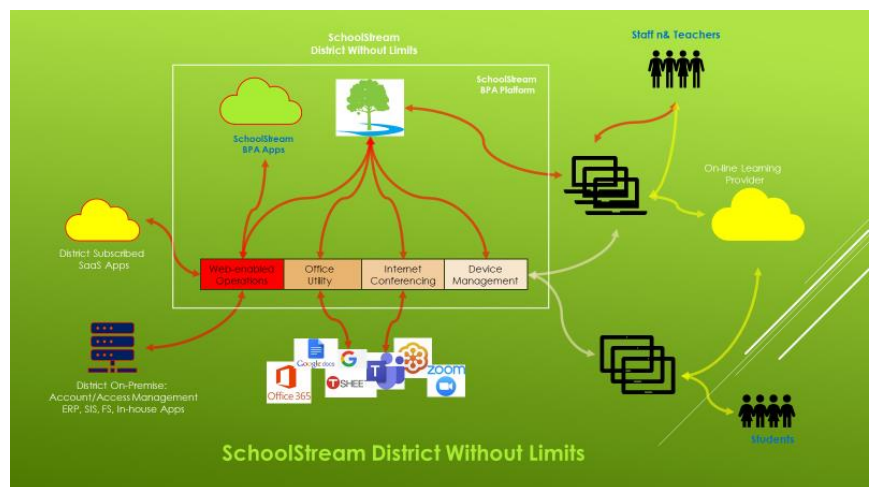

- In the K-12 community for over 15 years
- 95% client retention rate
- Working with districts/organizations in over 30 states

Our Solution

*SchoolStream empowers school districts with the platform to operate without boundaries and enable remote core operational processes. It provides the ability to keep the district connected with its students, parents, staff, and community wherever they are. The **District Without Limits** package provides the following essential layers.*

*The **BPAP** allows the district to enable their essential business operations to be accessed anywhere and the capability to connect with the other key essential layers of operating **Without Limits**. SchoolStream provides an architecture to connect between your web-enabled operations, office utilities, internet conferencing tools, and device management capabilities.*

SCHOOLSTREAM

How Does It Work?

SchoolStream's BPAP co-exists with the district/organization's IT infrastructure and builds the "information highways" between the applications through automated workflow and processes. School districts can automate any type of collaboration or business process on the platform and connect existing and future systems to extract/inject data in between systems for better information autonomy across the organization.

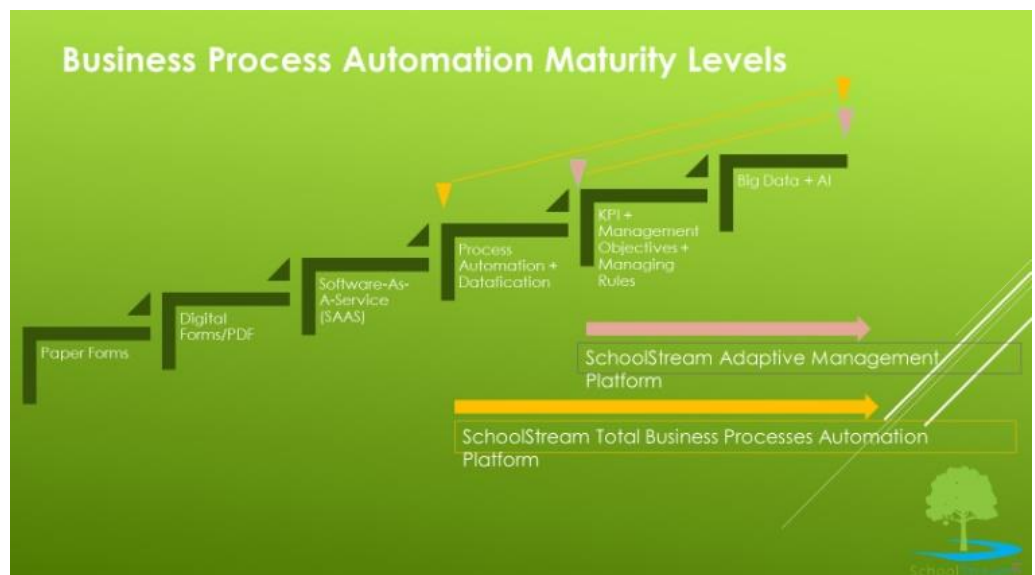

Information gathered from different systems can be combined, categorized, and analyzed at different stages of the workflow and automatically forwarded to the correct people for proper review, approval, and decision making.

All SchoolStream applications are designed to connect to each other and have an open architecture to easily allow integrations between existing/future IT systems.

Evolving with Your Organization

SchoolStream is a solution provider that builds long-term relationships with our clients. Acting like an extension of the district's organization, we are here to help you continuously resolve operational issues or technology needs.

We can help your district/organization with a future proof automation platform to reach the next stage of automation maturity.
