## On/Off Boarding Application
FREE Subscription for 1st Year

Who?

SchoolStream is hosting an On/Off-Boarding Application webinar to help districts learn how they can mitigate health risks, save costs, and increase efficiency for their staff and employees in the onboarding & offboarding process. **Registering and attending the webinar will automatically qualify you for a FREE subscription to the application for one year.**

When?

Webinars will be hosted at the following time slots. If you are unable to attend, please contact us at sales@rtresponse.com to coordinate a demo time:

- 7/7 @ 2:00pm ET
- 7/8 @ 2:00pm ET
- 7/13 @ 2:00pm ET

What is the On/Off-Boarding Application?

SchoolStream's On/Off-Boarding Application eliminates the paperwork and automates the workflow/approval of the onboarding and offboarding process for employees. Here are a few key features and value points:

- Digitize all onboarding and offboarding forms and send them to new employees to complete online
- Create different onboarding and offboarding form packages for different types of employees (certificated, classified, etc.)
- Automate the workflow and "parallelly process" each form in the package to have it route to the appropriate person or department for processing
- Create "common information" across all forms in the onboarding and offboarding form packages that can pre-populate fields by the HR department or new employee submitting the forms.
- Create dynamic reports off any data in the onboarding and offboarding packages for important data for decision makers
- Ability to export the data into different file formats for integration into financial/HR information systems to avoid double data entry
